DIY Thermal Print System

The Grafoplast EVOMAX thermal print system efficiently and quickly creates high quality, durable identification tags, strips and labels for wires, cables, terminal blocks, push buttons, devices and other components.

Applying a thermal transfer marking technique using special Grafoplast UV stabilised ribbons ensures a high quality transfer of the print instantly, so markers are ready to use right away!

Save time and convert your Autocad files or copy and paste directly from any windows application into the Simplo software, Its that simple!

- **Thermal transfer technology**

- **Quality high resolution print**

- **Low maintenance**

- **Print dries instantly**

- **No wastage**

- **Backup support eliminates downtime**

METALDETECTABLE

Metal Detectable Marking

Discover Grafoplast's metal detectable product range for the food and beverage processing, pharmaceutical and cosmetic industries. Printed on the EVOMAX thermal printer, these products are designed to satisfy international regulations and comply with the HACCP System.

The detection of foreign bodies during production and packaging phases is essential in environments where cleaning, hygiene and safety are essential requirements.

Our range of metal detectable marking products utilise a corrosion resistant, metal filler inserted into the tags, allowing them to be reliably identified by metal detectors. The blue colour of the material is designed to facilitate visual inspection by operator and/or by camera.

The raw material comprising Grafoplast's metal detectable product range is compliant with EU 10/2011 Reg.
